

(c) In cases where the Federal agency has sufficient information to determine the consistency of a proposed development project from planning to completion, only one consistency determination will be required. However, in cases where major Federal decisions related to a proposed development project will be made in phases based upon developing information, with each subsequent phase subject to Federal agency discretion to implement alternative decisions based upon such information (e.g., planning, siting, and design decisions), a consistency determination will be required for each major decision. In cases of phased decisionmaking, Federal agencies shall ensure that the development project continues to be consistent to the maximum extent practicable with the State's management program.

§ 930.38 Consistency determinations for activities initiated prior to management program approval.

(a) A consistency determination will be required for ongoing Federal activities other than development projects (e.g., waste disposal practices) initiated prior to management program approval, which are governed by statutory authority under which the Federal agency retains discretion to reassess and modify the activity. In these cases the consistency determination must be made by the Federal agency at the earliest practicable time following management program approval, and the State agency must be provided with a consistency determination no later than 120 days after management program approval for ongoing activities which the State agency lists or identifies through monitoring as subject to consistency with the management program.

(b) A consistency determination shall be required for major, phased Federal development project decisions described in § 930.37(c) which are made following management program approval and are related to development projects initiated prior to program approval. In making these new decisions, Federal agencies shall consider coastal zone effects not fully evaluated at the outset of the project. This provision shall not apply to phased Federal deci-

sions which were specifically described, considered and approved prior to management program approval (e.g., in a final environmental impact statement issued pursuant to the National Environmental Policy Act).

§ 930.39 Content of a consistency determination.

(a) The consistency determination shall include a brief statement indicating whether or not the proposed activity will be undertaken in a manner consistent to the maximum extent practicable with the management program. The statement must be based upon an evaluation of the relevant provisions of the management program. The consistency determination shall also include a detailed description of the activity, its associated facilities, and their coastal zone effects, and comprehensive data and information sufficient to support the Federal agency's consistency statement. The amount of detail in the statement evaluation, activity description and supporting information shall be commensurate with the expected effects of the activity on the coastal zone.

(b) Federal agencies shall be guided by the following in making their consistency determinations. The activity (e.g., project siting and construction), its direct effects (e.g., air, water, waste discharges, etc.), and associated facilities (e.g., proposed siting and construction of access road, connecting pipeline, support buildings, etc.) and the direct effects of the associated facilities (e.g., erosion, wetlands, beach access impacts, etc.) must all be consistent to the maximum extent practicable with the management program. Although nonassociated facilities (e.g., recreational housing which is induced by but not necessarily related to a Federal harbor dredging project—see § 930.21) must be included within the consistency determination's description of the direct effects of the activity, Federal agencies are not responsible for evaluating the consistency of such facilities.

(c) In making their consistency determinations, Federal agencies shall give appropriate weight to the various types of provisions within the management program. Federal agencies must
